- **Also:** REST API, Git, UML, TeamCity, HTML5, CSS3 (SCSS, LESS), Material-UI, Font Awesome, Swagger, SignalR and other related stuff.

About me

I am sociable and nice person to talk to, I can find a way to anyone. I have great organizational skills, potentially I can be a team leader. I have a good understanding of Agile (Scrum, Kanban, waterfall, work in progress, sprints, spikes, scrum poker...).

Employment History

Full-stack Developer, Software Country, Batumi, Georgia

JUNE 2021 – APRIL 2023

Project: examination testing for different groups of people used in schools, universities and other educational organizations.

- Developing backend services, APIs, updating databases and SQL scripts, integrating a big React component into already existing code, written in other technologies and other frontend tasks (React, Angular, Razor), amending UI libraries. Constructing the architecture. Migrating the old code to the new technologies.
- Writing unit, API tests, automation of manual tests (Selenium) and BDD tests (Gherkin,
- Heading daily scrums, planning of the features, presenting features, working as a "second pilot" of the team at the time the team leader was off. Communicating with American customers and British
- Fixing bugs, refactoring, code review and other common activities.

Full-stack Developer, Devstream, Minsk, Belarus

AUGUST 2020 – MAY 2021

Project: system for managing mortgages

- Displaying users data in real time, displaying, filtering the table data, implementing algorithms using mathematics, writing documentation, bug fixing, refactoring.

Project: an app for taekwondo organizations members

- Creating pages for data displaying, filtering, CRUD-operations, developing reusable components, bug fix.

Education

Bachelor in Applied Informatics, Belarussian State University, Minsk, Belarus

SEPTEMBER 2017 – JUNE 2021

Developed a REST API based on ASP.NET Core as part of a course project and later diploma (9/10 points).

Subjects that are directly connected to the position:

1. Data Models and DBMS
2. Computer Networks
3. Computer Technologies (Agile, projects implementing techniques, web apps)
4. Neural networks and other

Volunteering

Curator of foreign student groups, Student Union Belarussian State University, Minsk, Belarus

SEPTEMBER 2019 – DECEMBER 2019

As a curator I was responsible for quite everything, starting from meals and transportation and ending with even translation of excursions.
